

Blue Collar Meta (BLUE)

Whitepaper – Version 1.1

June 2025

1. Introduction

Renovation.Reviews is a community driven hub where contributors share renovation knowledge. Blue Collar Meta (BLUE) is a utility rewards coin on the TON blockchain that distributes value for verified real world contributions with full transparency.

2. Vision & Objectives

Our vision is to empower every trade and blue collar professional with an on chain economy that recognises tangible effort. Objectives include frictionless reward distribution, sustainable treasury management, and a decentralised ecosystem governed by its participants.

3. Token Overview

Name: Blue Collar Meta

Symbol: BLUE

Standard: TIP 3 Jetton (TON)

Decimals: 9

Token Root: EQAEWN2gcdaR7Wil9JcELF2VyBuRLVKIMJ99jTxv9Jw8LGjX

Ownership: Revoked – contract immutable

Tokenomics Allocation

Allocation	Amount	% Supply	Purpose
Burned	1.5 B	18.75 %	Permanently removed
Locked Liquidity	6 B	75 %	Time locked in TON DEX pools
Treasury & Dev	0.5 B	6.25 %	Rewards, grants, operations

4. Technology Stack

TON delivers Telegram native onboarding, sub second finality and fees under 0.005 TON, making micro rewards economically feasible. The open Jetton standard ensures wallet and DEX compatibility, while on chain DNS and mini sites enable Telegram embedded dApps such as claim portals.

5. Reward Mechanism

Contributors submit proof of achievement; community verifiers validate. A smart contract transfer then credits BLUE. TON's minimal fees sustain even small payouts.

6. Governance & Treasury

A multisig wallet safeguards the 0.5 B BLUE treasury. Proposals and disbursements require on chain voting, ensuring transparency and collective oversight.

7. Roadmap

- Q3 2025 – Airdrop & liquidity incentives
- Q4 2025 – On chain verification portal
- Q1 2026 – DAO governance & staking
- Q2 2026 – Cross chain bridge research
